General information

COMFORT module is designed to make car even more comfortable for driver with the following options*:

- closing of windows;
- side mirrors folding;
- central lock opening/closing.

Module benefits

COMFORT main benefits:

- Automatic management of the central lock, windows and mirrors
- Communication via CAN-bus
- Easy installation
- Tiny size

Operation description

COMFORT module automatically closes the car windows and the sunroof and folds the mirrors.

Option for mirror folding and closing of the sunroof depends on car model.

* Find the list of the available options for every car model on our website <http://author-alarm.com>

Ventilation mode

Ventilation mode means opening of windows after the button for security deactivation (unlock) on the car key is pressed three times. **By default this option is off.**

In this mode the windows go down for 10 cm. When the security is activated the windows will stay in the same position (even if the forced windows closing option is on).

Central lock opening and closing in a particular case

For some car models for security purposes the driver is protected by central lock closing option when the speed exceeds 10 km/h. For the cars with ignition via manual car key the central lock opens when the key is pulled away from the ignition slot. If car has «START-STOP» button the central lock opens when the ignition is off. **By default the central lock opening option is off.**

Settings change

The state of options installed in the system by default («switched on», «switched off») is marked with grey colour in the table.

In order to change the option state do the following:

Option	switched on	switched off
Service mode	5	4
Central lock opening on particular event*	6	7
Central lock closing at speed > 10 km/h	8	9
Ventilation	10	11
Comfort	12	13
Side mirrors folding	14	15
Additional option	20	21
Software change mode	22	-

1. Switch on the ignition without starting the engine.
2. Press the accelerator pedal as far as it can go and keep it pressed.
3. Press the service button the number of times needed to reach the particular state – «switched on» or «switched off» (see the figures in the corresponding column in the table). For example, press 14 times to switch on the Side mirrors folding mode or 15 times to switch it off. The indication signals will confirm the action. The option state will be changed.
4. Release the accelerator pedal.

Module software change

Before installing the COMFORT module on cars that are not Toyota/Lexus brand it is necessary to change the factory preinstalled software.
